1. Introduction

Hypervisor Educational Complex (HEC) is committed to providing high-quality, practical, and industry-focused digital education that prepares students for successful careers in the technology sector.

The Academic Regulations provide the official framework governing academic activities, student progression, programme completion, assessment standards, and academic responsibilities.

These regulations ensure consistency, fairness, transparency, and academic excellence across all programmes offered by the institution.

All students enrolled at Hypervisor Educational Complex are expected to understand and comply with these regulations throughout their academic journey.

2. Purpose of Academic Regulations

The purpose of these regulations is to:

- Establish academic standards across all programmes.
 - Define student academic responsibilities.
 - Provide guidelines for programme completion.
 - Ensure fairness in academic decision-making.
 - Maintain the quality and credibility of institutional qualifications.
 - Support effective teaching, learning, and assessment practices.
-

3. Scope and Application

These regulations apply to all students enrolled in:

- Diploma programmes.
- Professional certification programmes.
- Short courses.
- Online learning programmes.
- Future academic programmes introduced by the institution.

The regulations apply to:

- Students.
 - Lecturers.
 - Programme coordinators.
 - Academic administrators.
 - Examination officers.
-

4. Academic Structure

Hypervisor Educational Complex organizes academic activities through structured programmes designed around industry requirements and professional competencies.

Academic structures consist of:

Programmes

A programme is a complete course of study leading to a diploma, certificate, or professional qualification.

Examples:

- Diploma in Information Technology
 - Cloud Computing Certification
 - Web Development Certification
 - DevOps Engineering Certification
 - Cyber Security Certification
 - Digital Marketing Certification
-

Courses or Modules

Each programme consists of individual courses or modules that develop specific knowledge and skills.

Courses may include:

- Theory lessons.
- Practical exercises.
- Projects.
- Assessments.
- Examinations.

Learning Outcomes

Each programme defines expected competencies students should achieve upon completion.

Learning outcomes may include:

- Technical knowledge.
 - Practical application skills.
 - Problem-solving ability.
 - Professional communication.
 - Industry readiness.
-

5. Programme Requirements

Students must complete all requirements defined for their selected programme.

Programme requirements may include:

- Completion of required courses.
- Achievement of minimum grades.
- Completion of practical assignments.
- Successful completion of projects.
- Participation in required academic activities.
- Completion of final assessments.

Students cannot graduate unless all programme requirements have been satisfied.

6. Course Registration Regulations

Students must officially register for courses before participating in academic activities.

Course registration ensures that:

- Students are enrolled in approved courses.
- Academic records are accurate.
- Assessment results can be officially recorded.

Students are responsible for:

- Confirming registered courses.
 - Understanding course requirements.
 - Completing registration within deadlines.
-

7. Course Registration Changes

Students requesting changes to their registered courses must follow official procedures.

Changes may include:

- Adding a course.
- Dropping a course.
- Changing programme pathways.

Approval depends on:

- Programme requirements.
- Academic timelines.
- Availability.
- Institutional approval.

Students should not independently change courses without approval.

8. Learning and Academic Participation Requirements

Students are expected to actively participate in academic activities.

Academic participation includes:

- Attending classes.
- Completing assignments.
- Participating in practical activities.
- Engaging in discussions.
- Completing projects.
- Preparing for assessments.

Students who fail to participate consistently may experience academic challenges.

9. Academic Progression

Academic progression refers to a student's ability to continue successfully through their programme.

Students progress when they:

- Successfully complete required courses.
- Meet academic performance requirements.
- Maintain satisfactory academic standing.
- Complete required assessments.

Students who experience academic difficulties may receive academic support and guidance.

10. Academic Performance Standards

Students are expected to achieve satisfactory academic performance.

Academic performance is measured through:

- Assignments.
- Practical assessments.
- Projects.
- Examinations.
- Continuous assessment.

Students must demonstrate both:

Knowledge Competence

Understanding of academic concepts and principles.

Practical Competence

Ability to apply knowledge to real-world problems.

11. Academic Standing

A student's academic standing reflects their overall academic performance.

Students may be classified as:

Good Academic Standing

Students who meet programme requirements and maintain satisfactory performance.

Academic Support Status

Students experiencing academic difficulties may receive additional guidance and monitoring.

Support may include:

- Academic advising.
 - Additional learning resources.
 - Performance improvement plans.
-

Academic Probation

Students who consistently fail to meet academic requirements may be placed on academic probation.

Students on probation may be required to:

- Improve academic performance.
 - Meet specific improvement targets.
 - Receive academic counselling.
-

12. Course Failure and Reassessment

Students who fail a course may be provided opportunities based on institutional guidelines.

Options may include:

- Assignment resubmission.
- Additional assessment.
- Practical reassessment.
- Repeating the course.

Decisions depend on:

- Course requirements.
 - Academic performance.
 - Programme regulations.
-

13. Course Withdrawal

Students wishing to withdraw from a course must submit an official request.

Withdrawal approval may depend on:

- Timing of request.
- Academic impact.
- Programme requirements.

Students should seek academic advice before withdrawing from courses.

14. Deferral and Interruption of Studies

Students who are unable to continue their studies temporarily may request a deferral.

Reasons may include:

- Personal circumstances.
- Health-related situations.
- Financial challenges.
- Other approved reasons.

Approved deferrals allow students to resume studies under agreed conditions.

15. Programme Transfer

Students wishing to transfer to another programme must submit an official request.

Approval depends on:

- Entry requirements of the new programme.
- Available spaces.
- Academic progress.
- Institutional approval.

Students may receive guidance before making programme changes.

16. Recognition of Prior Learning

Hypervisor Educational Complex may consider previous learning or professional experience where applicable.

Recognition may consider:

- Previous academic qualifications.
- Professional certifications.
- Relevant industry experience.

Approval is subject to institutional review.

17. Academic Records

The institution maintains official academic records for all students.

Records may include:

- Admission details.
- Registration information.
- Course completion records.

- Assessment results.
- Certificates issued.

Students must ensure personal information provided to the institution remains accurate.

18. Graduation Requirements

A student qualifies for graduation after successfully completing all programme requirements.

Requirements may include:

- Completion of all required courses.
 - Meeting academic standards.
 - Successful completion of projects.
 - Completion of practical requirements.
 - Fulfilment of financial obligations.
 - Completion of administrative clearance.
-

19. Certification Requirements

Students who successfully complete approved programmes may receive official certificates issued by Hypervisor Educational Complex.

Certificates confirm that students have:

- Completed programme requirements.
- Demonstrated required competencies.
- Met institutional standards.

Certificates may only be issued after all requirements have been fulfilled.

20. Academic Appeals

Students have the right to appeal academic decisions through official procedures.

Appeals may relate to:

- Assessment decisions.
- Academic progression decisions.
- Examination outcomes.

Students submitting appeals should:

- Provide clear reasons.
- Include relevant evidence.
- Follow official timelines.

Appeals are reviewed fairly and objectively.

21. Academic Responsibilities

Students are responsible for:

- Understanding academic requirements.
 - Maintaining satisfactory performance.
 - Completing academic activities.
 - Following institutional regulations.
 - Maintaining academic integrity.
 - Seeking support when facing challenges.
-

22. Lecturer and Academic Staff Responsibilities

Academic staff are responsible for:

- Delivering quality instruction.
 - Providing clear learning expectations.
 - Supporting student development.
 - Assessing students fairly.
 - Providing feedback.
 - Maintaining academic standards.
-

23. Quality Assurance and Continuous Improvement

Hypervisor Educational Complex continuously reviews academic processes to maintain quality.

Quality assurance activities include:

- Curriculum review.
- Student feedback.
- Lecturer evaluation.
- Assessment moderation.
- Programme improvement.

The institution may update these regulations to reflect improvements and changing industry requirements.

24. Conclusion

The Academic Regulations of Hypervisor Educational Complex provide the foundation for a structured, fair, and high-quality learning environment.

Students are encouraged to understand these regulations, take responsibility for their academic journey, and actively participate in building the knowledge and skills required for success in the digital economy.
